# National/General Exam Content Outline for Salespersons

Effective: January 2025 or later. Please check back here for implementation dates.

The national/general portion of the real estate exam is made up of eighty (80) scored items, which are distributed as noted in the following content outline. Each section contains an overall item count and subtotals from each subsection. For example, if a major topic area has three (3) subtopics and ten (10) items, the subtopics will contain the number of items necessary to bring the total to ten (10) items.

In addition to building our real estate national/general exams to content specifications, Pearson VUE also builds our general exams to cognitive level specifications. These cognitive level specifications confirm that candidates have a comprehensive understanding of real estate general knowledge and federal regulation topics. They measure whether candidates have the knowledge, but more importantly, the skills and abilities to protect the public from day one as a real estate licensee. Every test item is classified into one of three categories: knowledge, application, or analysis. A knowledge item requires candidates to recall specific facts or definitions. An application item requires candidates to use their knowledge and apply it to a situation. An analysis item requires candidates to use their knowledge and examine a fact pattern in order to draw a conclusion or make a decision. Cognitive level breakdowns are included after the item count for major topic areas. For example, if a major topic area has ten (10) items, the cognitive level item counts will total to ten (10) items.

The national/general examination also contains five (5) pretest items that are not counted toward the score. These items are used to gather statistics on performance and to help assess appropriateness for use on future examinations. Because pretest items look exactly like items that are scored, candidates should answer all the items on the examination.

## Notes on Math Calculations

The following information is **NOT** available at the test center and **SHOULD** be memorized:

- 43,560 square feet/acre
- 5,280 feet/mile

If a question requires the calculation of prorated amounts, the question will specify:

- whether the calculation should be made on the basis of 360 or 365 days a year; and/or
- whether the day of closing belongs to the buyer or the seller for purposes of prorations

Where applicable, round off calculations using standard rounding rules.

Please note the content on the exam reflects the real estate industry as a whole and may not reflect any ongoing litigation or settlements.

## Notes on Math Calculations

The following information is **NOT** available at the test center and **SHOULD** be memorized:

- 43,560 square feet/acre
- 5,280 feet/mile

If a question requires the calculation of prorated amounts, the question will specify:

- whether the calculation should be made on the basis of 360 or 365 days a year; and/or
- whether the day of closing belongs to the buyer or seller for the purposes of prorations.

Where applicable, round off calculations using standard rounding rules.

Please note the content on the exam reflects the real estate industry as a whole and may not reflect any ongoing litigation or settlements.
